

Exposed Concrete roof waterproofing based on HYPERDESMO® AQUA

The sustainable system with its top elasticity, durability and high resistance is ideal application to roofs that are exposed to increasingly adverse weather conditions. HYPERDESMO® AQUA is a specialized elastomeric waterproofing membrane/coating of vertical and horizontal elements based on ALCHIMICA's unique water-based polyurethane technology.

1 PRIMING

AQUASMART®-DUR

2 WATERPROOFING

(1st coat)

HYPERDESMO® AQUA

3 WATERPROOFING

(2nd coat)

HYPERDESMO® AQUA

It fully ensures the external protection of buildings located in sea or mountainous areas while at the same time contributing to their aesthetic upgrade.
