

# 8.1

## Exposed Metal Roof based on the HYPERDESMO® System

Climatic conditions such as high temperatures, high moisture or heavy rains have a great impact in the lifecycle of metal sheets, causing corrosion and considerable damages that lead to water leaks.

- 1 PRIMING**  
MICROSEALER-50
- 2 SEALING**  
HYPERSEAL®-EXPERT-150
- 3 WATERPROOFING (1o coat)**  
HYPERDESMO® System
- 4 REINFORCEMENT WITH  
GEOTEXTILE IN DETAILS**  
GEOTEXTILE  
50 PRESSED or 45 PRESSED
- 5 WATERPROOFING (2nd coat)**  
HYPERDESMO® System
- 6 TOP COAT APPLICATION**  
HYPERDESMO®-ADY-E

ALCHIMICA's waterproofing system provides economical and durable refurbishment and protection for metal roofs in flat, inclined and vertical substrates.
